

ECHOCARDIOGRAPHY REPORT

Patient: Jane Smith

Date: 2024-02-20

Referring Physician: Dr. Johnson

FINDINGS:

Left Ventricle:

The left ventricle is normal in size and function.

LVEF: 62%

No wall motion abnormalities.

Right Ventricle:

Normal size and function.

Valves:

Mitral valve: There is systolic prolapse of the posterior mitral leaflet.

Moderate mitral regurgitation is noted with an eccentric jet directed posteriorly.

The mitral valve annulus is mildly dilated.

Aortic valve: Trileaflet. Normal function.

Tricuspid valve: Normal.

Left Atrium:

Mildly dilated at 40 mm, likely related to mitral valve disease.

IMPRESSION:

1. Mitral valve prolapse involving the posterior leaflet.
2. Moderate mitral regurgitation.
3. Mild left atrial dilatation.
4. Normal left ventricular systolic function.
